

Inventory Management. Simplified!

InnoVO's StockRoom Web™, a powerful web-based tool, drives sales and increases customer engagement by allowing your customers to easily analyze, manage, and optimize their inventory.

InnoVO StockRoom Web

StockRoom Web is an extension of StockRoom™ allowing your customers the ability to manage their inventory on the web. Customers can view and manage their product lists, on-hands, locations, min/maxes, and depending on authorization, can also edit and create new customer part numbers.

StockRoom Web allows your customers to see their product health status, inventory movement, report on slow and frozen products, along with an inventory valuation and recommendations on optimizing product levels and associated savings.

StockRoom Web gives you a major, competitive advantage that also builds strong customer retention. It strengthens the ties between you and your customers by offering them a seamless, efficient web-tool where they can analyze, manage, and optimize their inventory.

Finally, a powerful web-based inventory management tool that empowers your customers and increases their engagement. What's keeping you from giving your customers the benefits of StockRoom Web?

Features

- ✓ View product details including inventory levels, order history, min/max, suggested min and max savings, real-time pricing and availability
