

## Delivery. Solved.

Innovo's Deliver Pro™ is an integrated suite of easy-to-use mobile applications, and powerful web tools, designed specifically to meet your daily delivery needs.

### Deliver Pro

Innovo's Deliver Pro™ is an integrated suite of easy-to-use mobile applications, and powerful web tools, is designed specifically to help you optimize your deliveries and automate your fleet management process.

Deliver Pro™ is tightly integrated with Infor's CloudSuite™ Distribution to provide optimized route planning, turn-by-turn driver directions, proof of delivery capture, access to real-time delivery information, real-time fleet and driver visibility... and so much more!

Deliver Pro™ supports TWL and non-TWL warehouses, and makes sales orders, customer returns and warehouse transfers easy to manage and complete, all while increasing operational efficiencies and lowering costs.

Designed with ease of use, we kept simple scalability top of mind to be deployed across your organization at your own pace. This leads to increased profitability, higher levels of customer satisfaction, and rapid realization of your return on investment.

### Features

- ✓ **Optimize your daily delivery routes** and reduce miles driven and operational delivery costs.
- ✓ **Maximize your fleet effectiveness** through having real-time, fleet visibility and oversight.
- ✓ **Improve customer satisfaction** through providing accurate, real-time delivery information.
- ✓ **Increase operational profitability** through leveraging comprehensive, historical business analytics.

#### Route™:

An easy-to-use web tool offering automatic route planning, optimization, and manifest creation.

#### Deliver™:

An intuitive mobile app that increases driver efficiency through turn-by-turn directions, proof of delivery, and real-time communication.

#### DeliverWeb™:

A powerful web tool that provides live visibility into your fleet activity, real-time delivery information, and historical reporting of operational analytics.

#### Innovo Portal™:

A secure, cloud-based platform that provides comprehensive device and user management capabilities.

## Easily Optimize Delivery Routes

Innovo's Route™ uses the latest technology to provide you with simple and powerful ways to build and manage your delivery routes.

### Innovo's Route

There has never been an easier way to build and manage your delivery routes! Route automatically creates and optimizes your daily deliveries, all while meeting customer requested delivery windows.

You can easily re-sequence stops within a route, move stops from one route to another, and create new routes on the fly.

You'll have visibility into order details including address and shipping instructions, and detailed product information, such as product descriptions, weight and load factors, and hazardous and restricted product status. Route also makes it easy to verify and update delivery addresses and manually geocode for new construction.

Comprehensive reporting on route driven vs. suggested route, actual mileage driven, and total route time, enable you to improve your overall routing efficiencies.

### Features

- ✓ With a single click, routes are automatically created and optimized
- ✓ Easily verify delivery addresses and manually geocode for new construction
- ✓ Re-sequence stops within a route, move stops from route to another, and create new routes on the fly
- ✓ Schedule deliveries for a specific time or window meeting customer requests
- ✓ Compatible with Chrome, Safari, and Edge browsers

### Benefits

- ✓ Optimized routes greatly reduce miles driven and fuel costs
- ✓ Completely integrated with Innovo's Deliver™
- ✓ Increased customer satisfaction and reduced operational costs

## Empower Your Drivers!

Innovo's Deliver™ is an easy-to-use mobile app that increases delivery efficiency, driver effectiveness, supports real-time communication, and helps you deliver better customer service.

### Innovo Deliver App

Deliver puts your drivers in complete control. From the moment they leave, while they complete each stop, and until they return, they are provided with tools and information that makes their job easier, while increasing customer satisfaction.

Drivers are provided with GPS-based turn-by-turn directions and given the ability to handle delivery issues in real-time.

Deliver's powerful proof of delivery capabilities allow signatures and photos to be easily captured and attached to the invoice. Your customers can receive pre- and post-delivery notifications and can access a website to see real-time delivery information.

GPS tracking gives you live visibility into your fleet activity, real time delivery information, and historical reporting via Innovo's Deliver Web™ tool.

### Features

- Drivers are guided by GPS-based turn-by-turn directions
- GPS tracking enables real-time estimated and actual delivery times
- Drivers can easily capture signatures and photos
- Real-time communications allow drivers to handle delivery issues
- Improve customer satisfaction through pre-and post-delivery notifications
- Live tracking of your delivery trucks via Innovo's Deliver Web™ tool

### Benefits

- Better overall visibility into your deliveries and fleet
- More efficient deliveries and increased driver effectiveness
- Increased customer satisfaction and reduced delivery costs

## Ready for a Competitive Edge?

Innovo's Deliver Web™ gives you real-time visibility into your daily manifests, driver and truck location, delivery status, ETA's, proof of delivery information, and critical business analytics.

### Innovo Deliver Web

Deliver Web's advanced technology provides you with real-time information letting you easily manage your daily deliveries, empower your drivers, increase customer satisfaction, and gain invaluable business insight.

Real-time GPS tracking allows you to see exactly where your drivers are, the route they drove, how long they stopped, and monitor their speeds; as well as providing estimated and actual delivery times. Deliver Web's Compare feature, allows you to easily analyze delivery routes and overlay historical routes, to monitor and improve overall delivery efficiencies.

Comprehensive reporting lets you monitor and improve operating efficiencies such as meeting customer requested delivery times and analyzing customer and route profitability, enabling you to make better business decisions.

What's keeping you from gaining a competitive edge and leveraging the benefits of advanced technology?

### Features

- ✓ Easily manage your daily deliveries to create more efficient routes
- ✓ Real-time GPS tracking allows you to see where all your drivers are, and access live estimated and actual delivery times
- ✓ Handle delivery issues real-time through in-app driver messaging via the Innovo Deliver App™.
- ✓ Improve customer satisfaction through pre-and post-delivery notifications
- ✓ Historical reporting provides valuable insight into business analytics
- ✓ Compatible with Chrome, Safari, and Edge browsers

### Benefits

- ✓ Better overall visibility into your deliveries and fleet
- ✓ Increased customer satisfaction and reduced delivery costs
- ✓ Monitoring business analytics helps you increase profitability
